PROFESSIONAL SUMMARY

Computer Science graduate (2026) with hands-on software engineering experience building production-quality software in collaborative engineering environments. Strong problem-solving skills with a passion for designing scalable applications, learning new technologies, and contributing to high-impact engineering teams.

EDUCATION

B. E. Computer Science and Engineering	Sep 2022 – Jun 2026
<i>College of Engineering Guindy, Anna University</i>	8.17/10
12th Grade	Jun 2021 – Jun 2022
<i>Bharathidasan Matric Higher Secondary School, Tiruvallur</i>	97.33%
10th Grade	Jun 2019 – Jun 2020
<i>Bharathidasan Matric Higher Secondary School, Tiruvallur</i>	91.20%

SKILLS

Programming Languages: Java, JavaScript, C++ , C, Python, SQL

Java & Backend: Java 17, Spring Boot, REST APIs, Spring Data JPA, Hibernate, Spring Security, JWT

Web Technologies: JavaScript, HTML, CSS

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks

Databases & Systems: MySQL, SQLite, Linux, IPC

Cloud & DevOps: AWS (EC2, S3, IAM), Docker, GitHub Actions, CI/CD

Tools & Build Systems: Git, GitHub, Maven, CMake, Make, GCC, Linux Shell

PROFESSIONAL EXPERIENCE

Amazon – Software Development Engineer Intern	Jan 2026 – Jun 2026
<i>Kindle Platform Team C, C++ , Linux, Git, CMake, Brazil, Yocto Certification</i>	<i>Chennai</i>
- Developed and integrated a BLE-based Wi-Fi provisioning framework to replace the legacy device setup stack on Kindle E-ink devices, enabling secure production device registration and improving the device onboarding experience. - Designed and implemented a production-grade C++ daemon with 3 Hardware Abstraction Layer (HAL) interfaces for Wi-Fi and device information, adding WPA3 support and improving provisioning reliability across multiple Kindle hardware variants. - Redesigned inter-process communication (IPC) between networking services to resolve integration bottlenecks, implemented automatic device state transitions, and collaborated through Git-based development workflows with 20+ peer code reviews, contributing 7 production code changes that were successfully reviewed and merged. - Authored 10 technical design and implementation documents covering system architecture, feature design, setup workflows, and implementation details, improving knowledge sharing, maintainability, and onboarding for future development. - Debugged, validated, and verified provisioning workflows across 20+ Kindle hardware variants during a platform software migration, ensuring 100% successful device registration and backward compatibility within an Agile software development environment.	

PROJECTS

Customer Orders Management System GitHub	Jan 2025 – May 2025
- Built a backend application using Java 17 and Spring Boot for managing customers and orders through RESTful APIs. - Implemented database persistence using Spring Data JPA and Hibernate, following a layered Controller-Service-Repository architecture. - Added request validation and authentication using Spring Security and JWT to secure application endpoints.	
Marginalia – AI Document Assistant GitHub	Jun 2026 – Jul 2026
- Built a Flask-based AI document assistant using Retrieval-Augmented Generation (RAG) with FAISS/ChromaDB for document ingestion, semantic search, and question answering. - Containerized and deployed the application on AWS EC2 using Docker, with automated deployment through GitHub Actions CI/CD.	

LEADERSHIP

Head – Computer Society of Anna University (CSAU)	May 2025 – Jun 2026
<i>Led a 20-member Marketing & IR vertical, landing a Rs. 1,00,000 title sponsorship from Hay Clothing.</i>	<i>Anna University</i>
Associate Head – Anna University Student Entrepreneurship Club (AUSEC)	Mar 2024 – Mar 2025
<i>Managed sponsorship and industry relations for Enantra 9.0, securing Rs. 35,000 from Trends Clothing.</i>	<i>Anna University</i>
